Two clicks show what a correlation hides

A demo recorded from the real dashboard, not drawn

presentation-kit · software demo example · 2026

The dashboard gives the same r for two very different datasets; the residuals tell them apart

Source: Recorded with «kit.py demo» from app/index.html (demo.yml). Data: Anscombe (1973), The American Statistician 27(1), 17–21.

The video comes from running the code, step by step

- **demo.yml lists the task:** open, choose a dataset, click, zoom, wait.
- **kit.py demo performs it in a real browser** and takes a screenshot at every step.
- **Zoom, cursor and captions are added afterwards,** from the positions of the real elements.
- **If there is no code yet,** `mockup: true` stamps «Mock-up» on every frame.

Source: presentation-kit: engine/demo.py.
